

Pillar

Sustainability
Fundamentals

Decarbonisation and
Energy Efficiency

Climate Adaptation
and Resilience

Biodiversity and
Green Infrastructure

Climate Education
and Green Skills

Click on each milestone to learn more and access the resources to help you achieve it.

1 Setting the groundwork

Create a sustainability working group

Agree a sustainability vision

Understand any compliance requirements

Prioritise the first steps of your sustainability journey

2 Taking the first steps

Develop a short term Climate Action Plan

Complete a CPD audit

Encourage your parent voice

Establish a regular travel survey

Complete an energy review

Understand the types of emissions (Scopes) that contribute to your setting's carbon footprint

Identify some quick wins to decarbonise your setting

Conduct a waste audit

Complete a food and catering audit

Understand how your estate is susceptible to climate change

Complete a water audit

Complete a biodiversity assessment

Build a whole-setting awareness of biodiversity

Complete a curriculum audit

Introduce outdoor activities as part of learning

3 Developing your practice

Develop a behaviour change programme

Develop a sustainability policy

Develop a sustainability strategy

Develop an energy re-procurement plan

Identify some Scope 3 quick wins

Calculate your carbon footprint

Develop your net zero vision

Develop a waste management plan

Develop a sustainable travel plan

Complete a climate risk assessment

Set some short, medium and long term adaptation aims

Develop a vision and mission statement on biodiversity

Audit your site suppliers

Establish an outdoor learning space

Complete a curriculum review to identify links to green skills and jobs

Set some short, medium and long term climate education and green skills aims

Integrate climate education into learning

4 Learning to lead

Develop your Supply Chain Re-procurement Plan

Develop a CPD programme

Align all policies and strategies with your sustainability policy and strategy

Identify some longer term Scope 3 interventions

Develop a decarbonisation strategy

Develop a plan for net zero

Improve your carbon emissions data

Publish your first annual emissions report

Develop a long term sustainable travel plan

Develop a climate adaptation strategy

Develop a climate adaptation plan

Develop an emergency response plan

Set some long term biodiversity objectives and targets

Identify long term biodiversity improvements

Develop a biodiversity delivery plan

Develop learners' awareness of nature stewardship

Establish an outdoor learning programme

Develop a delivery plan for your climate education and green skills

5 Advanced actions

Develop a long term Climate Action Plan

Establish collaborative working practices with all suppliers

Seek a costed appraisal of your decarbonisation plan

Publish your first annual emissions report

Identify a specialist to audit your adaptation plan

Embed environmental considerations into your decision making

Maximise your use of outdoor space to improve biodiversity

Embed links to green skills and careers across teaching
